FlexPro

Private Cloud Platform for PaaS & SaaS

The Private Cloud market

Market situation

- Private Cloud market is expected to triple in the next 3 years.
- Most CIOs agree that Cloud is the most important initiative to reduce costs.
- Security concerns in Public Cloud is pushing the growth of Private Cloud.
- Lack of expertise and bespoke support also benefit Private Cloud.
- Privacy and the need to know where data are located.
- A Cloud platform deployment still involves serious complexity and time.

FlexPro: simplified Private Cloud Platform for PaaS and SaaS applications.

FlexPro is a compact, Plug & Play appliance with state of the art virtualization technology with all software built-in. It is an efficient, reliable and optimized Private Cloud platform for PaaS and SaaS applications. Equally useful for end-users who want to deploy their own Private Cloud or for I.T. Services Providers who want to start instantly offering PaaS and SaaS by-passing the time and complexities of integrating a Cloud platform.

- PaaS: Customer can provision self-service Virtual Machines (Linux or Windows):
  - On demand sizing
  - Backup embedded
  - Scalable
  - High Availability through clustering
- SaaS: Huge library with more than 400 software applications (i.e. ERP, DB, CRM…) included.

Two solutions to match your needs:

FlexPro SMB

- 1U
- Cores: 16 to 96.
- DRAM: 32GB to 128GB
- Storage: up to 12TB raid 5 (included hotspare)

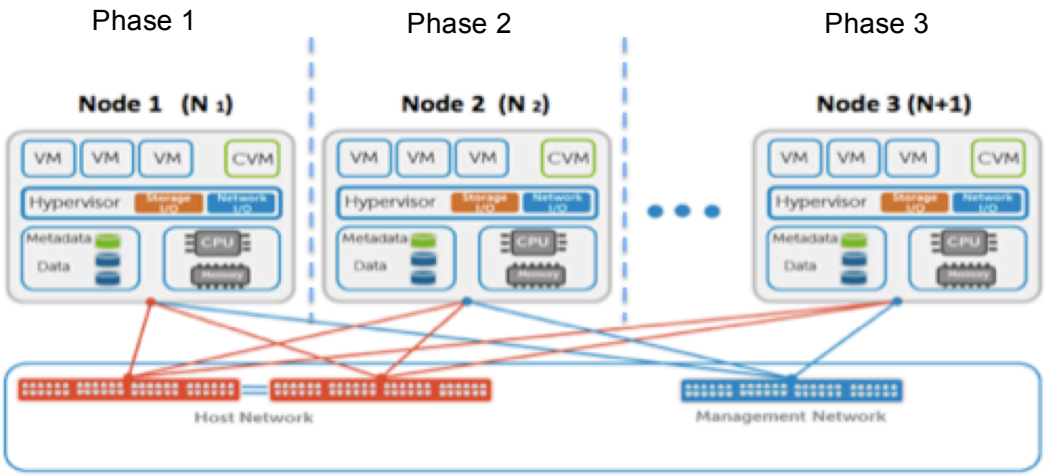

FlexPro Enterprise

- 2U
- Cores: 48 to 192.
- DRAM: 128GB to 512GB
- Storage: up to 30TB (Expandable)

Scalable architecture:

Benefits

- Highly Secure
- Resilient 2N
- Simplified: plug & play
- Personalized Support
- Modular
- Flexible
- Scalable
- Green
- Cost effective

FlexPro provides instantly the benefits of a Private Cloud in a simplified way, in one single appliance. It includes all hardware and software to provide PaaS and SaaS. FlexPro includes several security layers and is equally useful for Organizations that want to have their own Private Cloud quickly or for I.T. Service Providers who want to start offering Private Cloud services without the complexities and long time needed to integrate a Cloud platform. It is scalable and can have redundant modules. Due to the use of state of the art Virtualization technology FlexPro is extremely cost effective too.
